

## ALLNET 4duino Puls Herzfrequenz Sensor Modul

### EAN CODE

ALLNET 4duino Puls Herzfrequenz Sensor Modul Product Model: OKY3471  
XD-58C Pulse Rate Sensor Heartbeat Heart Rate Detector Module for Arduino  
Product Description

This XD-58C pulse sensor module is used to measure heart rates. It's widely applied for developing heart rate related interactive works.

It also has an open source APP program that can display your heart rate real-time in graph. It's in short, a heart rate sensor integrated with optical amplifier and noise elimination circuit.
